

popular-web-designs — versi 1.0.0

Popular Web Designs

54 real-world design systems ready for use when generating HTML/CSS. Each template captures a site's complete visual language: color palette, typography hierarchy, component styles, spacing system, shadows, responsive behavior, and practical agent prompts with exact CSS values.

Related design skills

- `claude-design` — use for the design *process and taste* (scoping a brief, producing variants, verifying a local HTML artifact, avoiding AI-design slop).

Pair it with this skill when the user wants a thoughtfully-designed page styled after a known brand: `claude-design` drives the workflow, this skill supplies the visual vocabulary.
 - `design-md` — use when the deliverable is a formal DESIGN.md token spec file, not a rendered artifact.
-

How to Use

1. Pick a design from the catalog below
2. Load it: `skill_view(name="popular-web-designs", file_path="templates/<site>.md")`
3. Use the design tokens and component specs when generating HTML
4. Pair with the `generative-widgets` skill to serve the result via cloudflared tunnel

Each template includes a **Hermes Implementation Notes** block at the top with:

- CDN font substitute and Google Fonts `<link>` tag (ready to paste)
- CSS font-family stacks for primary and monospace
- Reminders to use `write_file` for HTML creation and `browser_vision` for verification

HTML Generation Pattern

```
<pre><code><!DOCTYPE html>

<html lang="en">

<head>

<meta charset="UTF-8">

<meta name="viewport" content="width=device-width, initial-scale=1.0">

<title>Page Title</title>

<!-- Paste the Google Fonts <link> from the template's Hermes notes -->

<link href="https://fonts.googleapis.com/css2?family=..." rel="stylesheet">

<style>

/* Apply the template's color palette as CSS custom properties */

:root {

--color-bg: #ffffff;

--color-text: #171717;

--color-accent: #533afd;

/* ... more from template Section 2 */

}

/* Apply typography from template Section 3 */

body {

font-family: 'Inter', system-ui, sans-serif;

color: var(--color-text);

background: var(--color-bg);

}

/* Apply component styles from template Section 4 */

/* Apply layout from template Section 5 */

/* Apply shadows from template Section 6 */
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<!-- Build using component specs from the template -->
```

```
</body>
```

```
</html>
```

```
</code></pre>
```

Write the file with `write_file` , serve with the `generative-widgets` workflow (cloudflared tunnel), and verify the result with `browser_vision` to confirm visual accuracy.

Font Substitution Reference

Most sites use proprietary fonts unavailable via CDN. Each template maps to a Google Fonts substitute that preserves the design's character. Common mappings:

| Proprietary Font | CDN Substitute | Character |

|---|---|---|

| Geist / Geist Sans | Geist (on Google Fonts) | Geometric, compressed tracking |

| Geist Mono | Geist Mono (on Google Fonts) | Clean monospace, ligatures |

| sohne-var (Stripe) | Source Sans 3 | Light weight elegance |

| Berkeley Mono | JetBrains Mono | Technical monospace |

| Airbnb Cereal VF | DM Sans | Rounded, friendly geometric |

| Circular (Spotify) | DM Sans | Geometric, warm |

| figmaSans | Inter | Clean humanist |

| Pin Sans (Pinterest) | DM Sans | Friendly, rounded |

| NVIDIA-EMEA | Inter (or Arial system) | Industrial, clean |

| CoinbaseDisplay/Sans | DM Sans | Geometric, trustworthy |

| UberMove | DM Sans | Bold, tight |

| HashiCorp Sans | Inter | Enterprise, neutral |

I waldenburgNormal (Sanity) I Space Grotesk I Geometric, slightly condensed I

I IBM Plex Sans/Mono I IBM Plex Sans/Mono I Available on Google Fonts I

I Rubik (Sentry) I Rubik I Available on Google Fonts I

When a template's CDN font matches the original (Inter, IBM Plex, Rubik, Geist), no substitution loss occurs. When a substitute is used (DM Sans for Circular, Source Sans 3 for sohne-var), follow the template's weight, size, and letter-spacing values closely — those carry more visual identity than the specific font face.

Design Catalog

AI & Machine Learning

I Template I Site I Style I

|---|---|---|

I `claude.md` I Anthropic Claude I Warm terracotta accent, clean editorial layout I

I `cohere.md` I Cohere I Vibrant gradients, data-rich dashboard aesthetic I

I `elevenlabs.md` I ElevenLabs I Dark cinematic UI, audio-waveform aesthetics I

I `minimax.md` I Minimax I Bold dark interface with neon accents I

I `mistral.ai.md` I Mistral AI I French-engineered minimalism, purple-toned I

I `ollama.md` I Ollama I Terminal-first, monochrome simplicity I

I `opencode.ai.md` I OpenCode AI I Developer-centric dark theme, full monospace I

I `replicate.md` I Replicate I Clean white canvas, code-forward I

I `runwayml.md` I RunwayML I Cinematic dark UI, media-rich layout I

I `together.ai.md` I Together AI I Technical, blueprint-style design I

I `voltagent.md` I VoltAgent I Void-black canvas, emerald accent, terminal-native I

I `x.ai.md` I xAI I Stark monochrome, futuristic minimalism, full monospace I

Developer Tools & Platforms

I Template I Site I Style I

|---|---|---|

| `cursor.md` | Cursor | Sleek dark interface, gradient accents |

| `expo.md` | Expo | Dark theme, tight letter-spacing, code-centric |

| `linear.app.md` | Linear | Ultra-minimal dark-mode, precise, purple accent |

| `lovable.md` | Lovable | Playful gradients, friendly dev aesthetic |

| `mintlify.md` | Mintlify | Clean, green-accented, reading-optimized |

| `posthog.md` | PostHog | Playful branding, developer-friendly dark UI |

| `raycast.md` | Raycast | Sleek dark chrome, vibrant gradient accents |

| `resend.md` | Resend | Minimal dark theme, monospace accents |

| `sentry.md` | Sentry | Dark dashboard, data-dense, pink-purple accent |

| `supabase.md` | Supabase | Dark emerald theme, code-first developer tool |

| `superhuman.md` | Superhuman | Premium dark UI, keyboard-first, purple glow |

| `vercel.md` | Vercel | Black and white precision, Geist font system |

| `warp.md` | Warp | Dark IDE-like interface, block-based command UI |

| `zapier.md` | Zapier | Warm orange, friendly illustration-driven |

Infrastructure & Cloud

| Template | Site | Style |

|---|---|---|

| `clickhouse.md` | ClickHouse | Yellow-accented, technical documentation style |

| `composio.md` | Composio | Modern dark with colorful integration icons |

| `hashicorp.md` | HashiCorp | Enterprise-clean, black and white |

| `mongodb.md` | MongoDB | Green leaf branding, developer documentation focus |

| `sanity.md` | Sanity | Red accent, content-first editorial layout |

| `stripe.md` | Stripe | Signature purple gradients, weight-300 elegance |

Design & Productivity

| Template | Site | Style |

|---|---|---|

| [airtable.md](#) | Airtable | Colorful, friendly, structured data aesthetic |

| [cal.md](#) | Cal.com | Clean neutral UI, developer-oriented simplicity |

| [clay.md](#) | Clay | Organic shapes, soft gradients, art-directed layout |

| [figma.md](#) | Figma | Vibrant multi-color, playful yet professional |

| [framer.md](#) | Framer | Bold black and blue, motion-first, design-forward |

| [intercom.md](#) | Intercom | Friendly blue palette, conversational UI patterns |

| [miro.md](#) | Miro | Bright yellow accent, infinite canvas aesthetic |

| [notion.md](#) | Notion | Warm minimalism, serif headings, soft surfaces |

| [pinterest.md](#) | Pinterest | Red accent, masonry grid, image-first layout |

| [webflow.md](#) | Webflow | Blue-accented, polished marketing site aesthetic |

Fintech & Crypto

| Template | Site | Style |

|---|---|---|

| [coinbase.md](#) | Coinbase | Clean blue identity, trust-focused, institutional feel |

| [kraken.md](#) | Kraken | Purple-accented dark UI, data-dense dashboards |

| [revolut.md](#) | Revolut | Sleek dark interface, gradient cards, fintech precision |

| [wise.md](#) | Wise | Bright green accent, friendly and clear |

Enterprise & Consumer

| Template | Site | Style |

|---|---|---|

| [airbnb.md](#) | Airbnb | Warm coral accent, photography-driven, rounded UI |

| [apple.md](#) | Apple | Premium white space, SF Pro, cinematic imagery |

| [bmw.md](#) | BMW | Dark premium surfaces, precise engineering aesthetic |

| [ibm.md](#) | IBM | Carbon design system, structured blue palette |

| [nvidia.md](#) | NVIDIA | Green-black energy, technical power aesthetic |

| `spacex.md` | SpaceX | Stark black and white, full-bleed imagery, futuristic |

| `spotify.md` | Spotify | Vibrant green on dark, bold type, album-art-driven |

| `uber.md` | Uber | Bold black and white, tight type, urban energy |

Choosing a Design

Match the design to the content:

- **Developer tools / dashboards:** Linear, Vercel, Supabase, Raycast, Sentry
- **Documentation / content sites:** Mintlify, Notion, Sanity, MongoDB
- **Marketing / landing pages:** Stripe, Framer, Apple, SpaceX
- **Dark mode UIs:** Linear, Cursor, ElevenLabs, Warp, Superhuman
- **Light / clean UIs:** Vercel, Stripe, Notion, Cal.com, Replicate
- **Playful / friendly:** PostHog, Figma, Lovable, Zapier, Miro
- **Premium / luxury:** Apple, BMW, Stripe, Superhuman, Revolut
- **Data-dense / dashboards:** Sentry, Kraken, Cohere, ClickHouse
- **Monospace / terminal aesthetic:** Ollama, OpenCode, x.ai, VoltAgent
